SAMPLE FILE FOR A THESIS WITH THE ‘PITTETD’ CLASS

I. M. Student, PhD

University of Pittsburgh, 2017

This document is a sample file for the creation of ETD’s at Pitt through L^AT_EX.

TABLE OF CONTENTS

1.0 INTRODUCTION

We begin by saying that we do not really have much to say, but for the sake of clarity we divide our topic in chapters.

2.0 SECOND CHAPTER

The topics treated in this chapter can be somewhat obscure. For humanitarian considerations, the chapter will be subdivided.

2.1 FIRST SECTION

The topic treated here, given its complexity, merits an additional subdivision.

2.1.1 First subsection of the section

This is well-known topic, and we shall discuss it no more.

2.1.2 Second subsection of the section

This is a very complicated topic and we shall discuss it in our next paper.

3.0 CONCLUSIONS

This is the second chapter of the present dissertation. It is more interesting than the first one, for it is the last one.
